Software Engineering:Sprint 2

Features of Our Application defined as User Stories:

RideBuddy aims to provide exercise enthusiasts a platform to be able to connect with each other whilst enjoying their favourite physical activities.The features implemented to help them do so are listed below in the form of user stories.

As a user,I would like to register so that I can find people to accompany me on my daily walks/cycle trips.

As a user,I would like to register with my personal details so that I can find people local to my area.

As a user,I would like to have access to safety tips and emergency numbers so that I can call for help in case of an emergency.

As a user,I want to be able to report people that made me uncomfortable so that I can feel safe while using the app and connecting with people.

As a user,I want my trips and journeys to be recorded so that I can track my progress.

As a user,I want to be able to have access to maps and routes within my location so that I can use the app for commuting as well.

As a user,I want to be able to send a ride request to a profile so that I can run or cycle with people I think I am compatible with.

As a user,I want to be able to decline a ride request from a profile so that I do not have to run or cycle with people I think I am incompatible with.

As a user,I want my progress to only be visible to me so that I am assured my data is not being shared with random people.

Designs and Colour Schemes:

The colour scheme for our app is centered around the colours White, Green and Orange.Our app aims to create a visually aesthetic interface for users so that they look forward to getting on the app,therefore, we avoided using harsh and extra bright colours to prevent creating an overstimulating user experience that would draw users away from our app.The colour scheme creates a calming and refreshing environment that's not only pleasing to the eye but also evokes positive feelings helping users feel reassured and excited as they embark on their journey with their companion.
